About Me

I'm Giacomo, a web developer from Rimini, Italy, with a background in electronics and telecommunications. My passion for creative projects led me to explore IT, developing embedded system prototypes. After earning a degree in Engineering and Information Technology, I began my career as a web developer, always seeking new challenges and growth.

Soft skills

- Idea sharing & collaboration
- Teamwork
- Sense of responsibility
- Commitment & professionalism
- Problem-solving mindset
- Adaptability & continuous learning
- Attention to detail

Hard skills

- HTML, CSS, JavaScript
- Responsive Design
- CSS Preprocessors (Sass)
- JavaScript Frameworks (React, Vue, Angular)
- State Management (Redux, Pinia, Vuex)
- Component-based Architecture
- Next.js
- TypeScript
- Automated Testing (Jest, Cypress) for unit and end-to-end testing
- CSS-in-JS (Styled Components, Tailwind CSS)
- GraphQL & REST API Integration
- Git & GitHub/BitBucket Version control
- CI/CD
- Webpack, Vite
- Docker
- Design Systems & UI Libraries (Storybook, Chakra UI, Radix UI, ShadCN, PrimeVue, Vuetify, AntD)

Education

- 2015** ● **Bachelor's Degree in Computer Engineering and Information Technology**
University of Bologna – Final grade: 101/110
I earned a degree in Computer Engineering and Technologies from the University of Bologna, expanding my knowledge with additional coursework in electronics. I developed a strong interest in Embedded Systems Programming (IoT), leading me to focus my thesis on designing a smart shower system for sports facilities.
- 2010** ● **Expert Diploma in Electronics and Telecommunications**
Technical Institute of Rimini
I earned a technical diploma in Electronics and Telecommunications from the Industrial Technical Institute in Rimini. During my studies, I developed a passion for circuit board design and took my first steps into programming, using Assembly to control a servo-motor robotic arm with a PIC16F87 microcontroller.

Experience

- 2024-PRESENT** ● **Travelware s.r.l**
Fullstack developer
 - Contributed to the MVP development using the T3 stack.
 - Implemented multilingual support with Next.js and improved expertise in React.
 - Designed the database structure using PostgreSQL, configured Prisma ORM, and integrated NextAuth for authentication.
 - Established development workflows, including Git hosting on BitBucket, pull request reviews, and CI/CD pipelines.
 - Currently** developing a centralized translation management system using Tolgee and DeepL to streamline multilingual content handling.
- 2021-2023** ● **Spiagge.it**
Frontend developer
 - Led the migration from a PHP-based system to Vue.js, ensuring a smooth transition.
 - Worked extensively with Vue.js, implementing Vuex and Pinia for state management.
 - Developed a custom web component using Lit, enhancing reusability and integration.
 - Provided maintenance and development for legacy PHP projects.
 - Built a company dashboard in Vue.js to support the customer service team.
- 2021** ● **Mago.io**
Frontend developer
 - Maintained and improved the company website built with Gatsby, marking my first experience with React.
 - Enhanced the UI design and supported the development team on an internal Vue.js application.
 - Led the development of an internal company dashboard, built from scratch with Vue.js.
- 2019-2021** ● **Mr. APPS**
Fullstack developer
 - Developed various WordPress websites and PrestaShop e-commerce platforms.
 - Managed maintenance and third-party module integration for a custom PrestaShop module.
 - Built new features and APIs for backend projects using Symfony and ExpressJS.
 - Developed and maintained web applications with Angular 2 and Vue.js.
- 2017-2019** ● **Retorica Comunicazione**
Frontend developer
 - Developed custom WordPress themes with advanced customizations.
 - Created in-house WordPress plugins to extend functionality.
 - Designed and developed e-commerce themes for Magento 2.
